Wallpaper Generator is a small software application developed specifically for helping you create and set random gradient wallpapers using straightforward actions. S Wallpaper Generator Screenshots: Wallpaper Generator Publisher's Description: Wallpaper Generator is a small software application developed specifically for helping you create and set random gradient wallpapers using straightforward actions. Portable running mode You can store Wallpaper Generator on USB flash drives or other portable devices and carry it with you all the time. In addition, you may open it without administrative privileges. Double-clicking on the executable file is sufficient for getting access to the program's GUI because there's no installation setup included in the process. Plus, you can run it directly from the storage device on the target PC. You may get rid of it using a quick deletion task of the files that you have downloaded from the Internet because it does not store entries in your Windows registry and leave other configuration files. Straightforward layout Wallpaper Generator sports a clean and intuitive feature skeleton, leaving no rooms for ambiguities. You can get an idea about how to make the most out the application's features in a short amount of time even though you cannot appeal to a help manual. Generate gradient wallpapers Wallpaper Generator offers you the possibility to set up four colors for creating the gradient wallpaper. The colors are automatically mixed in the main panel and you can also preview the adjustments in real time. In case you are not in the mood for manually picking colors from the built-in palette, you are given the freedom to automatically generate random gradient wallpapers. Other important options worth being mentioned enable you to set the current wallpaper with a single click and save the colors used for creating the wallpaper to a plain text file. The TXT item is automatically stored in the same location where the application is kept. Tests have pointed out that Wallpaper Generator carries out a task quickly and without errors. It does not eat up a lot of CPU and memory resources so the overall performance of the computer is not hampered. Final observations To sum things up, Wallpaper Generator lets you design gradient wallpapers using lots of colors on the fly. This way, you can quickly add a new touch to your desktop.The Elder Scrolls: Legends is now free to play Blizzard made its MOBA, Heroes of the Storm, free-to-play in 2014. This meant it was able to experiment with new ways to find users and experiment with new gameplay modes. The result was a booming player base and a lot of early feedback for the developers. It would be no surprise if Blizzard's game designers followed this same formula with The Elder Scrolls: Legends, its free-to-play take on the popular card game. The company just dropped a new trailer for the game, with gameplay and details that indicate it has a
