## What's New in the AutoCAD?

**Markup Assist:** Markup Assist is an extension that enables AutoCAD users to work with CAD data and other sources of content in a similar way to LibreOffice Writer or Microsoft Word. You can mark up content using common markup tags that can be set up to work in Autodesk products. **AutoCAD User Interface:** With AutoCAD, you can spend less time trying to solve specific problems and more time designing. You'll be able to complete more work in a shorter time period and get the job done more quickly. **Part Design and Simulation:** Simulate and visualize performance and features of parts before you build them. Use HDF (nano-grid) as well as STL (convex) files. **Part Design and Simulation:** Automatically create parametric rules for more efficient design of parts and assemblies. **Fluid Simulation:** Simulate the behavior of fluids using fluid variables such as pressure, temperature, and velocity. **Fluid Simulation:** Automatically create parametric rules for more efficient design of parts and assemblies. **Creative Cloud:** Software made for collaboration, innovation, and creativity, Creative Cloud offers a vast library of tools for you to use. This includes the latest Adobe Creative Cloud desktop apps (Adobe Photoshop, Adobe Illustrator, and Adobe InDesign), as well as access to libraries of stock photography and illustration, video and animation, and custom content creation tools. **Productivity:** Use your hands to type quickly or use Autoscratch to improve your typing and learn to touch type in minutes. **Productivity:** Use your hands to type quickly or use Autoscratch to improve your typing and learn to touch type in minutes. **Exercise More With Less:** You can now drag your mouse to drag, right-click, or use keyboard shortcuts to move objects around. You can also create move, rotate, and scale commands to move, rotate, or scale an object faster
